

Southern Farm Forestry and Landcare Services

Southern Farm Forestry and Landcare Services operates throughout the South West and Great Southern regions of WA.

We are available to assist landholders and farmers achieve their objectives and plans for revegetation for multipurpose results, as well as assisting in the management of privately owned native forests and woodlands for commercial and conservation outcomes.

Our services include the following:

1. Planning and Design for multipurpose revegetation.
2. Land assessment and capability research and reporting.
3. Implementation and management services.
4. Native forest management for conservation and profit.
5. Helping to build economic, social and ecological resilience in rural communities through planned, considered and appropriate revegetation and vegetation management strategies.

Julian Sharp has many years' experience in the farm forestry, plantation establishment, landcare and sustainability fields. Qualifications and experience include the Diploma of Conservation and Land Management, Sustainable Development and Environmental Science at Murdoch University, an accredited Australian Master Tree grower, an active member of the South West Agroforestry Network, Peer Group Mentor with the Australian Agroforestry Foundation, a Community Landcare Technician, management of a Land for Wildlife registered property and an Executive Committee member of the Warren Catchments Council.
